

The Florida Masonic Child ID Program was created as a free service to raise public awareness concerning the risk, prevention, and safety precautions associated in the abduction and exploitation that our Children are facing in today's society. This program is provided to the communities and State of Florida, in an effort to help assist in the expeditious and immediate dissemination of pertinent information about the Child to the proper authorities, the media and the public in locating Children that are reported missing or abducted in conjunction with the AMBER ALERT.
